AKASH INANI

www.linkedin.com/in/akash-inani-97471a129

IT Analyst at TCS (Digital Certified | Data Analytics | Life Science Domain – R&D Wing) | Analytics & Automation | Data Engineering Solutions - AWS | Digital Business Transformation | Data Governance | Product Engineering | R / Python / Database Developer | Data Analysis & Visualization Expert

Email: akashinani0110@gmail.com

Phone: +91-7503009797

Address: 22/301 Eastend Apartments, Mayur Vihar Phase -1, Ext, Delhi – 110096

Competent and Dynamic professional having around 6 years of experience in the field of analytics with excellent knowledge to analyze and creatively interpret data to provide organizations with effective problem solutions and assist with decision making. Have worked on multiple engagements for helping organizations in advanced analytics, process automation and visualizations, AWS implementation, data warehousing, prototype development, etc.

Data Analyst

A strong belief that high quality analytics work can only be achieved by understanding the fundamentals, being meticulous, and paying attention to details

- With experience in R/Python/Database Development and good analytical and communication skills, got the opportunity to lead the team of 6 for a reputed pharmaceutical company and provide software solutions to business problems for digital Farming applications.
- Provide digitized agricultural solutions for Crop Protection by combining Agronomy needs with IT solutions
- Work closely with cross-functional teams of analysts, regional team leads, product managers and business owners to drive changes based on opportunities identified
- Expertise in quantitative analysis, data mining, and the presentation of data to identify opportunities for business improvements and support your recommendations
- Identify areas of improvement and provide technical solutions.
- Maintain documentation for prototype tools in agile Environment.
- Using agile methodology to take feedbacks in the team via Retrospective.
- Brainstorming ideas using scrum meetings within the team and stakeholders toget the requirements and to bring out of box solutions.
- Confidence in presenting ideas and findings to stakeholders with the right level of detail
- Creation of dashboards on R shiny for the exception's reports integrated with Microsoft AWS S3/ Document DB/ AWS Cognito/ AWS Quick Sight.
- Identify new and track key metrics to closely monitor team's performance and identify quick and long-term opportunities for improvements.
- Built Customer Support and Analysis Tool using shiny Framework
- Using AWS service – **Lambda** for automatic scalability and quicker iterativedevelopment for building **agronomical Models**.
- Designing the data structure in **PostgreSQL** for the Agricultural data coming fromacross the world.
- Automating steps that were still done manually by bringing different software solutions together...
- Working with **Docker containers** to automate the deployment process of R/Python services.
- Used AWS SDK in JavaScript to create custom application

Real Time Project Experience

1. Experience in building data management solution to meet up large data volume challenges and do real-time data analytics and provide data for machine learning algorithms which can act as Analytical tool for providing intuitive/descriptive/operational and historical visualization of data.
   Tech Stack - R, Shiny, Python, AWS (Cognito, Lambda, API Gateway, ECR, EC2)
   Features Implemented:
   - Building advance UI using R-shiny
   - Single sign on using federation service with AWS Cognito
   - Customizable user dashboard with CRUD operation up to 2 level descriptive and intuitive analysis
   - Advanced search option to fetch more than million(s) of object within seconds
   - Fetch and Upload heterogeneous Object(s) using API
   - Parsing and forming Complex JSON based on use cases
   - Created R package and deployed functions over AWS Lambda
2. Built Prototype solution for Field Trial planning App that helps farmer through a digitally supported stream-lined process where agronomists and farmers can carry out extensive experiments within fields across the globe, maintaining proper process, documentation and ensuring base line quality with various tools within the web application. Thus, saving 70-80% of precious time of end consumer.
   - Worked on Geo-spatial Programming and shape files
   - Built scalable and dynamic shiny App that caters need of agronomist
   - Visualized scouting Maps, Trial Maps over google map, satellite map using different R packages

Other Experience

- Worked on micro-services architecture and created rest API using spring boot framework java and used hibernate as ORM.
- Automated manual work done in project like work status collection, leave tracker management generating reports, etc
- Created Customer Analysis tool and Customer Support Tool for client's commercial application
- Ability to visualize data over different views based on geo-coordinates, images, metadata

WORK EXPERIENCE

TCS INDIA *{2017 Jan – 2019 Dec}*

TCS GERMANY *{2019 Dec – 2022 June}*

EDUCATION

Bachelor Of Technology

Computer Science

APJ Abdul kalam Technical University

2012 – 2016

SKILL SET

Technical Expertise: Data Analytics, Business Intelligence, Application Development, RESTful Web Services, Unit testing, Agile Methodology, Prototype Development, Java Development

Database: PostgreSQL, MySQL

Tools: RStudio, PyCharm, Putty, WinSCP, PgAdmin, Jira, Postman, Bitbucket

Frameworks & Technologies: SQL, R Programming, Shiny Web Framework, Python, Docker, Spring Boot

AWS Services: Quick Sight, Lambda, S3, API Gateway, Cognito, EC2, ECR, Faregate, CI/CD Pipeline

Server: Shiny Server, Apache

Tools: Postman, Putty

Operating System: Windows, Linux

Languages: Fluent in English, Learning German

AWARDS

1. Special Achievement Award
2. Best Team Award
3. Service and Commitment Award
4. On the Spot Award
5. Fresco Play Mile Award

CERTIFICATIONS

1. Python in Data Science
2. R in Data Science
3. PostgreSQL – Advances Queriers
4. Business Intelligence Specialist
5. Advanced SQL for Data Scientist
6. Agile Product Manager
